

## CONFIGURATION MANAGEMENT AUDITING (CMA01)

Configuration Auditing closes the loop in effort to attain integrity in terms of product data.

### Course Objectives:

To provide a step-by-step guide and instruction on the planning and execution of CM Audits. The course covers aspects such as the role of the Audit Team, qualities of a CM Auditor and the closed-loop audit process, including consolidation of findings and the compilation of an audit report. In addition, many tips, based upon the experiences of the Instructor will be conveyed.

This is an advanced course and is not suitable for the beginner in CM.

### Who Should Attend:

- Configuration Managers
- CM Practitioners

### Additional Information:

- This course is based upon the traditional approach to CM (MIL-STD and ISO)
- Course duration: 2 days
- Each course is limited to 10 learners
